

# Snapshot of Inequity:

## City of Baltimore, 2016

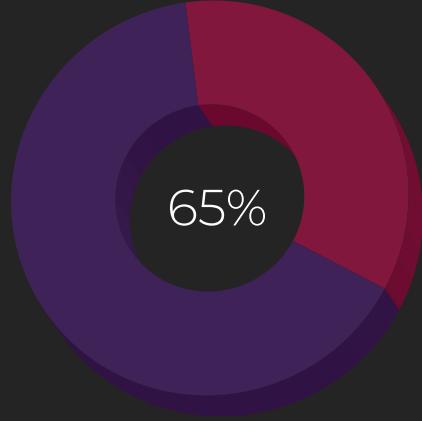

**Figure 2:** This figure shows the education level across the same neighborhoods. It shows that the neighborhoods with lower income also have lower education levels.

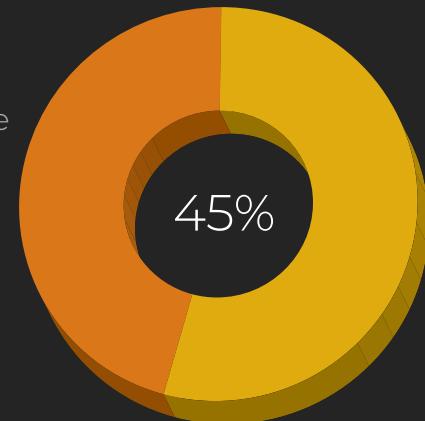

### Race and Access to Prenatal Care 2016

<20% African American Neighborhoods

>80% African American Neighborhoods

Mothers in Baltimore's predominantly African American Communities are far less likely to have access to the prenatal care that they need, potentially leading to more instances of infant mortality.
